# Exporting Michigan Soybeans through U.S. Pork in 2025

In 2025, pork exports accounted for

## 2.33 million bushels

of Michigan soybean usage

## Market Value

In 2025, the market value of pork exports to

**Michigan Soybeans = $23.66 million**

(soybeans consumed by pork exports at average annual soybean price)

2.33 million bushels x $10.17 per bushel

## Bushel Value Impact

For the estimated total economic impact:

In 2025, pork exports contributed

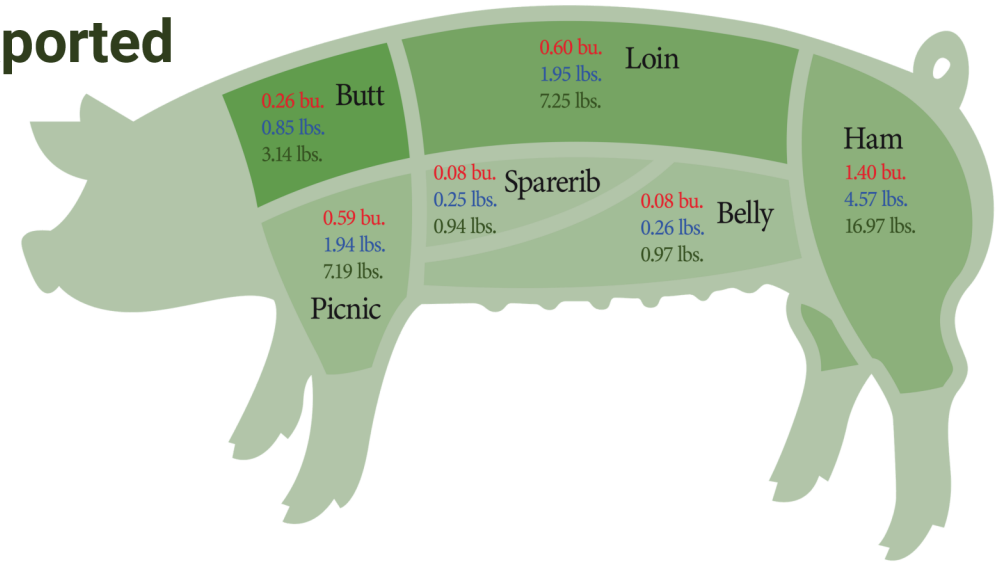

**10.3% of bushel value = $1.05**

based on the $10.17 average per bushel price in 2025

## Feed Use by Cuts Exported

*Per Head Slaughtered in 2025*

Bushels of Corn
Lbs. of DDGS (Dried Distillers Grains)
Lbs. of SBM (Soybean Meal)

# In 2025

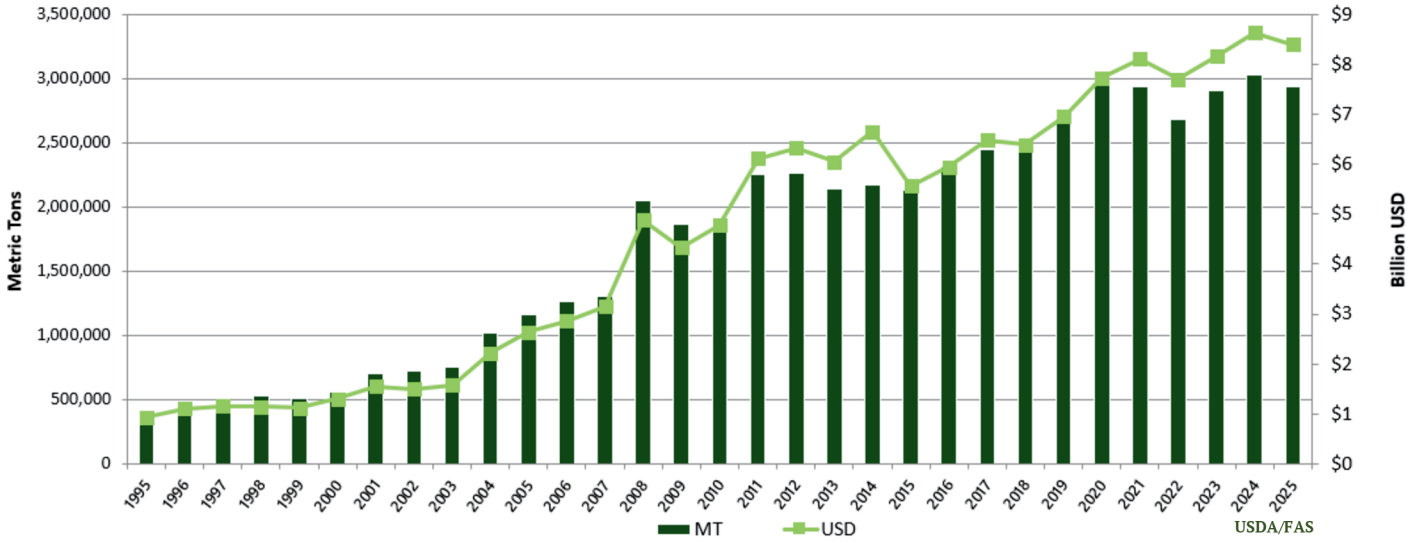

**Pork export volume equated to 50.6 lbs. per head slaughtered,** 9.4 lbs. of which were pork variety meats

Pork export value equated to **$65 per head slaughtered** in 2025
(export value divided by 2025 commercial hog slaughter)

Pork production increased by 13% from 2015, while **pork exports increased by 38%** (including variety meats) during the same time frame

**29.6%** of U.S. pork and pork variety meat production was exported

## U.S. Pork & Variety Meat Exports

**"The soybean industry provides critical support for USMEF's efforts to expand global demand for U.S. pork,"** says USMEF Senior Vice President of Industry Relations John Hinners. **"This study helps quantify the return on that investment."**

The U.S. Meat Export Federation (USMEF) is a non-profit trade association that works to create new opportunities and develop existing international markets for U.S. beef, pork and lamb. USMEF is a unique collaboration of nine distinct segments of American agriculture, joining together to implement successful marketing programs for U.S. pork, beef and lamb around the world.
